RESEARCH OVERVIEW & TECHNICAL SKILLS

My research spans *social and cognitive neuroscience and psychology*. I am interested in how humans of all ages navigate real-world social interactions. I *combine quantitative and qualitative approaches, including behavioral and neuroimaging methods* (fNIRS) to study group and individual-level psychological processes using *multivariate statistical approaches*. My technical skills include:

- **Statistical Analysis** using R (Frequentist & Bayesian approaches), MATLAB & Python for signal processing
- **Neuroimaging** expertise (fNIRS), mobile & hyperscanning techniques, including design, recording, analysis
- **Experimental design** and programming (Python, R, MATLAB)
